Sidenko Dmytro

Fullstack Developer

Ede, Netherlands | +31 62 647 0233 | sidenkodima2202@gmail.com | linkedin.com/in/dimon4ik | github.com/dimon2202

SUMMARY:

Fullstack Developer with 3+ years of experience building production web applications with React, Next.js, TypeScript, Node.js, and Express. Experienced in REST APIs, SQL/NoSQL databases, JWT authentication, WebSockets, testing, CI/CD, and cloud deployment. Use Claude Code extensively for AI-assisted development, debugging, testing, and workflow automation. Strong focus on clean architecture, performance, maintainability, and end-to-end feature ownership.

HARD SKILLS:

- ***Frontend:*** React, Next.js, TypeScript, Redux, Zustand, Tailwind CSS, Styled Components, HTML5, CSS3, Three.js, GSAP
- ***Backend:*** Node.js, Express, REST APIs, WebSockets (Socket.IO), Stripe API, Prisma ORM
- ***Databases:*** PostgreSQL, MongoDB, SQL
- ***DevOps & Tools:*** Git, GitHub, CI/CD, Docker, Webpack, ESLint, npm/yarn, Jira
- ***Testing & Quality:*** Jest / Playwright / Cypress
- ***AI & Productivity:*** AI-assisted development (ChatGPT, Clode), automation of development workflows

EXPERIENCE:

Front-End Developer

Darkbot Inc. - AI-powered Crypto Trading Platform (FinTech) 04/2024- 04/2026 · 2 years

- Built production SPA/SSR applications with React, Next.js, TypeScript, Redux, and Styled Components for a live crypto trading platform.
- Developed scalable front-end architecture for trading dashboards, analytics interfaces, and marketing pages with a focus on performance and maintainability.
- Implemented a reusable i18n system with next-i18next supporting multiple locales and future market expansion.
- Delivered responsive cross-browser experiences across desktop and mobile devices under tight startup release cycles.
- Debugged and resolved critical production issues in collaboration with backend and product teams, helping maintain platform stability.

Full Stack Engineer

ENACTUS KNEU 03/2023 - 03/2024 · 1 year

- Developed responsive, component-based web applications using React, Redux, JavaScript, and REST APIs, delivering user-friendly interfaces for educational and humanitarian platforms.
- Collaborated with designers and backend developers in an Agile/Scrum environment, translating business and user requirements into clean, maintainable frontend solutions.
- Integrated REST APIs and contributed to improving communication between frontend and backend services, ensuring reliable data flow and a smooth user experience.
- Refactored reusable UI components to improve application performance, and cross-browser compatibility.

PROJECTS:

Full-Stack Real Estate Platform · [Live Demo] · [GitHub]

- Designed and independently developed a full-stack real estate platform, taking ownership of frontend architecture, REST API design, authentication, database modeling, and deployment.
- Built a React + TypeScript frontend with Zustand, reusable components, responsive UI, interactive maps, and backend-driven property search and filtering.
- Developed a modular Node.js/Express REST API for authentication, users, properties, chats, messages, and administration, with custom validation and protected routes.
- Implemented JWT authentication with access/refresh tokens and HTTP cookies; designed the MongoDB data model with Prisma and integrated Cloudinary for property image management.
- Implemented real-time private messaging with Socket.IO, wrote unit tests, configured CI/CD, and deployed the application to Render.

EDUCATION:

Fullstack Developer - MATE ACADEMY 07/2025 - Present

Bachelor’s Degree in Computer Science - Kyiv National Economic University 09/2021 - 06/2025
